

## Silverthread Launches Updated Portfolio Dashboard

The updated CodeMRI Portfolio Dashboard brings the Portfolio to the web with an all-new user experience and in-depth code tracking for easier control and resource allocation.

Silverthread's newest Portfolio update delivers an easy to read dashboard that meets the needs of today's CIOs, CTOs, and engineering leads. The modernized UX allows software leaders to have the same easy visibility into their software portfolio as they do for their stock portfolio.

### The CodeMRI Portfolio helps leadership:

- Monitor refactoring efforts with regular updates on code quality and remediation progress with objective metrics
- Understand strengths and weaknesses in software by scanning to understand the locations of architectural weak points and estimate the cost of remediation

- Manage a large portfolio without systems falling through the cracks
